Transitgas: Maintenance Activities for gas year 2018-2019

Rev.9 (29.08.2018)

			October				November					December				January					February				March				April				May					June				July				August					September				October				
		Calender weeks	40	41	42	43	44	45	46	47	48	49	50	51	52	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44
		Days																																																											
	TRANSITGAS																																																												
	Pipeline	**Activities**																																																											
9	TRG23-24	Yearly valves check with Swiss Authorities																																													2													
10	TRG30 (Oltingue - Lostorf)	MFL pig run																																													2													
11	TRG30 (Oltingue - Lostorf)	Cleaning pig run																																				1																						
12	TRG11+12 (Wallbach - Ruswil)	MFL pig run																																														3												
13	TRG11+12 (Wallbach - Ruswil)	Cleaning pig run																																				1																						
14	TRG21 (Wallbach - Däniken)	MFL pig run																																														2												
15	TRG21 (Wallbach - Däniken)	Cleaning pig run																																				1																						
16	TRG22 (Däniken - Ruswil)	MFL pig run																																													2												
17	TRG22 (Däniken - Ruswil)	Cleaning pig run																																				1																						
18	TRG23+24 (Ruswil - Masera)	MFL pig run																																															3										
19	TRG23+24 (Ruswil - Masera)	Cleaning pig run																																				3																						
	Stations	**Activities**																																																										
20	Compressor Station Ruswil	First level inspection TK-C - PGT25DLE 20MW																																																										
21	Compressor Station Ruswil	First level inspection TK-D - PGT25DLE 20MW																																																										
22	Compressor Station Ruswil	TK-A control system exchange and Turbine emission upgrade																																																										
23	Compressor Station Ruswil	Yearly safety functions of the Ruswil compressor station with Swiss Authorities																																													3												

Legend:

- interruption of gas transport
- with capacity reduction (the number inside the cell points out the effective days or months of the reduction)
- no redundancy (only the sufficient power available - no stand-by)
- full redundance available
- Modulation during the Gasday.
- Major maintenance periods: from 6th August to 26th August; Early maintenance periods: from 4th June to 10th June;
- Additional maintenance periods as possible "second choices": from 2nd July to 15th July; from 2nd April to 6th May
